P.S. Dr. Sir.

I hope the old saying that "No news is good News." is true as we have nothing from you for a considerable time. The weather has been uncommonly disagreeable and I have been much at home. At Albany there are intreagues without numbers a certain class adhere to the design of making Mr. Clinton the head of what is called the Northern Interest. Letters from Mass. have had much influence in this question:- this interference has given great offence to another class.—

We begin to count time in respect to your arrival here. In the mean I remain affect. yrs.

Otis. Wolcott.

P.S. Love to Laura of course.
