Northampton May 4th 1829

1829

My dear Sir

Geo. is now returned from his visit to Boston & seems to be in a fine mood for study & improvement — he goes on as before except in Mathematics in which branch Geometry takes the place of Algebra & the application of the latter to the former will come next in course. He says [illegible] give him a chance to show his horsemanship during the summer — I have never seen the boys in better spirits or apparently better disposed & more pleasant. —

Messrs G. & S. Higginson (Pine Street) have a dft on you for $105 — should you be in town have the goodness to call on them & say when you will find it convenient to give them the amount — I am much obliged to you for the seeds & if Mr Bancroft has not I venture to thank you also in his name for the trees & shrubs you sent him

respectfully

your friend & sr

Jos. G. Cogswell
