monthly untill late. I wish the trees to be well shaped, sound, and of at least two inches in diameter three feet from the ground, and good strong branches, and a sufficient quantity of sound roots. I must prefer paying a little higher price, to have a choice and select such as will answer. The Gentlemen have not been sufficiently careful in their names of fruit, and seldom do we obtain the kinds, we are promised. If you will select them and send them to me, as well packed & secured as it is practicable by the first vessel, directed to me, and draw upon me at sight for the amount, you will confer upon me a great favor, which shall be ever acknowledged with gratitude

by your friend and humble Sr

John Heard Jr
