upon the Stoluchwannish ~~mine~~ in workable seams but ~~too distant from water~~ not accessible to water transportation. The Coal at Bellingham Bay ~~will~~ It must be lightered on board of vessels, the water being shallow to a considerable distance from the shore.

The whole of this formation has been considered by geologists as tertiary & the coal as not belonging to the true coal measures. Be this as it may its value for economical purposes is unquestionable. Even that on the Cowlitz & Skookum Chuck, though inferior to the product of the Dwamish & Bellingham bay mines was abandoned only from its not being accessible to tide water.
