longer — the people are sick of it.
I saw Withers & Stark the other day — they were both looking well —
they promised to stop & see me again but have not done so.
I have to leave here in an hour or two on private business
that will occupy me a couple of weeks — so you must
excuse the brevity of this — which is only to tell you
how matters stand about the boundary.
I have been worked almost to death of late — but hope to
find time before the steamer sails to sit down & write
you a good long letter — of Europe &c —
Remember me kindly to all my friends — particularly
Goldsborough & Simmons — give my love to Charly Mason
& believe me in haste
Ever your friend
Geo B McC
