and ready to devour at least one entire company of Mexicans. I hope he will write to me for the mitt. My letters are of course for all and to all. What is Hs standing in the army - I suppose he is Second Lieutenant of infantry with $1500 a year. Where is he to be sent to and when? I should like also to hear from Olivier if he is still in town. How does he get on with his medical studies? I intended to have written to him by this mail but plainly not have time. I have sent one of the packages of books and received an answer which I will send him in due time. He will I suppose write immediately after his return from the west. I should like to hear your views about Dr Torrey's plan in case I return a year from now. I am afraid he is mind too sanguine in regard to getting funds then again I must lay out a considerable sum in chemicals and on the furnishing of the laboratory and I do not know whether I can afford to

very much. I would rather not [illegible] like the College of Physicians

latter which I can get. Medical schools [illegible] two great advantages in my view. In the first place as the course last but [illegible] much time is afforded for original researches and secondly medical schools are always connected with religious sects and are neither Presbyterian nor Baptist nor any other sect or creed. What Dr Torrey says about the professorship in America is [illegible] each teaching to [illegible] Most of them are worked to death and many [illegible] men in the course of them which [illegible] one single original prof contributes one single new fact to science. I should like to leave Dr Stevens's views with regard to the establishment of an analytical school in connection with the College, whether I could lectures in the Spring and whether I could take a not respectable position in the College without in any way interfering with Dr Torrey. I will order Dr Torrey's balance for him at once. He can forward moneys for it by way of Hamburg. I suppose if he deposit moneys in the hands of Messrs Schlesinger in New York I can draw upon Messrs Arnold Schlesinger in Hamburg the balance with packing &c &c complete will cost 80 pounds Sterling and to this must be added a few Thalers for freight and insurance (if wished). I wish also to be informed to whom care it is to be shipped. I will try and send you some things at the same time. I can always send the Doctor anything he may require by way of Hamburgh and George can let him know how to transmit funds to me. I must close my letter here or I should be too late for the steamer. I send best love to all including the smallest. I will write shortly in the fall a more particular account of my journey which I hope will be welcome to her. Remember me to all friends and thank Mrs Morris for the letter

Your affectionate son Albert.
