and ready to devour at least one entire company of Mexicans. I hope he will write to me for the matter. My letters are of course for all and to all. What is Hy's standing in the army - I suppose he is beneath a Lieutenant of infantry with £150 a year. Where is he to be sent to and when? I should like also to hear from Olivier if he is still in town. How does he get on with his medical studies? I intended to have written to Dr Y this week but should not have time. I have sent one of the packages of books and received an answer which I will send him in due time. He will I suppose write immediately after his return from the west. I should like to hear your views about Dr Yorke's plan in case I return a year from now. I am afraid he is mad too penguins in regard to getting fuchsia, them again I must lay out a considerable sum in chemicals and on the furnishing of the laboratory and I do not know whether I can afford to

[illegible] connected with a medical school like the College of Physicians

very much. I would rather not [illegible] latter which I can get. Medical schools [illegible] first place as the course last but [illegible] and secondly medical schools are [illegible] Presbyterian nor Methodist nor any other sect or creed. What Dr Yorke says about the professorship in America is [illegible] and many [illegible] contribute one single new fact to science. I should like to have Dr Stevens views with regard to the establishment of an analytical school in connection with the College, whether I could lecture in the Spring and whether I could take a respectable position in the College without in any way interfering with Dr Yorke. I will order Dr Yorke's balance for him at once. He can forward money for it by way of Hamburgh. I suppose if he deposit money in the hands of Messrs Schiles wigen in New York I can draw upon Messrs Arnold Schiles wigen in Hamburgh the balance with packing case complete will cost 20 pounds Sterling and to this must be added a few Thalers for freight and insurance (if wished). I wish also to be informed to whom case it is to be shipped. I will by and send you some things at the same time. I can always send the Doctor anything he may require by way of Hamburgh and George can tell him how to transmit funds to me. I must close my letter here or I shall be too late for the steamer. I send best love to all including the smallest. I will write Amy in the fall a true and particular account of my journey which I hope will be welcome to her. Remember me to all friends and thank Mrs Morris for the letter

Your affectionate son Robert.
