Berlin Aug 23d/96 1896

I received on Sunday 18th your letter of the 15th July which was welcome being the first from the
Engadine. I wrote to the Steamer of the 4th of this month and
have no doubt you received it. I am still hoping on in Berlin finishing my work
for publication, but I begin to feel very tired and shall be glad when I can
get away. I have again changed my plans
in the Autumn but hope to leave on the course of this week. I leave again changed my plans
for the winter. The Professor demanded me plunge from June to January and keep that
time entirely for him. I refused but was obliged finally to promise. Accordingly I make about 6
visits to Paris between now and then, and shall have much time for my own work.
I think I shall be in Paris about the end of September and hope to find you there.
I have been too busy to write to Wm of late
and perhaps that he will not have returned from the west when this reaches you. and
I shall stay at Interlaken a few days and then go to Paris. I shall be in Paris about the end of September
I hope to be in Paris next Spring but can judge better when I am there.
